

モンゴルで歯科保健医療援助活動を実施
感謝状と感謝楯をいただきました

2024年8月7日、8日、富士谷、前田、夏目フェローを含む一行が、ウランバートル郊外のゲル地区の児童保護育成施設で歯科保健医療援助のボランティア活動を行いました。

200余名のむし歯だらけの子供たちを対象に、ART(非侵襲的修復治療)を主とした歯科診療と、ブラッシング指導とフッ化物塗布を主とした口腔衛生指導を行いました。

さらに、自分の子供の口の中にむし歯の洪水が押し寄せても全く理解のない、あるいは関心すらない親に対しても、子供の口腔衛生教育を含めた指導を積極的に行いました。

活動を通じた地域の口腔健康における意識と認知の向上における貢献に対し、施設から感謝状を、また協力機関の Etugen 大学歯学部より感謝楯をいただきました。

Dental Health Care Support Activities in Mongolia

Received a Certificate of Appreciation and a Plaque of Appreciation

Morioki FUJITANI, Fellow of the Section VII, Japan

On August 7 and 8, 2024, a delegation including Fellows Fujitani, Maeda and Natsume volunteered to provide dental health care support at Magic Mongolia Child Protection and Development Center (Magic Land 1 & 2) in a Ger District on the outskirts of Ulaanbaatar.

They provided dental care, mainly ART (atraumatic restorative treatment), and oral hygiene instruction, mainly brushing instruction and fluoride application, to more than 200 children with many carious teeth.

In addition, they actively provided guidance, including oral hygiene education for children, to parents who had no understanding or even interest in the flood of carious teeth in their children's mouths.

Through these volunteer activities, they received a certificate of appreciation from the facility and a plaque from the Etugen University School of Dentistry for our contribution to raising awareness and recognition of oral health in the community.
